MONTHLY REPORT

Website, Digital Content & Search Performance

October 2026

REPORTING PERIOD	1 – 31 October 2026
SEARCH DATA WINDOW	1 – 28 October 2026 · Google Search Console, last 28 days, web search
PREPARED FOR	Management, Sarvadnya Infotech LLP
PREPARED BY	Website & Digital Content function
SOURCES	Website & Digital Content Tracker · Search Console performance export (31 Oct)
PREVIOUS REPORT	Biweekly Report (5 – 17 October 2026)

Executive summary

October in one page

October is the month the website moved from *being indexed* to *being found*. Impressions grew more than four-fold inside the month and the site now appears for classes of demand it previously did not reach: TSS licensing, cloud access, vouchers, shortcuts, company discovery in CBD Belapur, and Hinglish queries.

The growth did not convert at the same rate. Impressions rose **214%** in the second half of the month while clicks rose **115%**, and click-through rate fell from **2.37%** to **1.25%**. That is the normal signature of pages entering page one faster than their titles and descriptions can be tuned for them. The largest commercial gap this month is not ranking. It is **capture**.

145	8,620	1.68%	7.03
CLICKS · 28 DAYS	IMPRESSIONS	CLICK-THROUGH RATE	AVERAGE POSITION

ALSO MEASURED	VALUE	READING
Pages receiving impressions	102	The indexable surface is now measurable
Queries logged	376	30% of impressions are itemised; the rest is long tail
Top page by clicks	66	Home, split across the https and http variants
Top page by impressions	1,647	`/news/how-to-lock-data-in-tallyprime`
Best single day	27 Oct	1,038 impressions · 13 clicks
Zero-click pages above 40 impressions	8	1,525 impressions, no clicks — snippet problem

DELIVERY SNAPSHOT — THE OTHER HALF OF THE MONTH

Website updates	**10 of 10 completed**, none overdue, median turnaround 1 day
Digital content	20 assets designed · **15 ready** · **0 posted with a date**
Weekly creative target	Met in 1 of 4 weeks · audio/visual 0 of 4
Site releases	117 commits — Tally Insights, Razorpay go-live, `/shop`, site-wide titles

Sections 2 to 8 cover search performance and opportunity. Sections 9 to 11 cover delivery and production. Sections 12 to 14 cover trends, the November plan and measurement notes.

> **The one-line conclusion.** October built reach and collateral. November must convert reach into clicks — through titles, meta and internal links — and convert collateral into published posts.

Five findings that matter

1 **Demand is compounding; capture is lagging.** Impressions ran at 150/day in week 1 and 654/day in week 4 (+336%). Over the same traffic base, clicks converted at 1.25% in week 4 instead of 2.37% in week 1. The audience arrived; the invitation to click did not keep pace.

2 **One article carries the month.** `/news/how-to-lock-data-in-tallyprime` holds 1,647 impressions — 19% of all impressions — at an average position of 3.1, and earns 30 clicks, 21% of the month's total. It ranks well above its click rate. That gap is the cheapest upside on the site.

3 **The commercial clusters are ranked and invisible.** Tally Cloud access drew 1,171 impressions across query and page reports for one click. TSS and licence queries drew 378 impressions for zero clicks at average positions between 3.5 and 6. Both are revenue audiences, not readers.

4 **Non-brand search does not yet convert.** Branded queries convert at 6.67%; non-brand at 0.82%. Where non-brand does work — local company discovery in Belapur and Navi Mumbai — it converts at 2.29% and accounts for 10 of the 19 attributed non-brand clicks. That is the proven, repeatable template.

5 **Content production is healthy; content distribution is not.** Fifteen of twenty logged assets are marked Ready, two are in design, two await approval, one is cancelled. Only one row carries a posted date, and that row is the tracker's sample entry. October produced a brochure library, not a publishing cadence.

WHERE OCTOBER'S EFFORT WENT

WEBSITE	CONTENT	PUBLISHED	CREATIVE TARGET
10	**20**	**0**	**1 / 4**
tasks completed · none overdue · median 1 day	assets designed · 15 marked Ready	assets carrying a posted date	weeks met · audio/visual 0 / 4

WHAT CHANGED MATERIALLY IN OCTOBER

Tally Insights section	Built, split into individually indexable pages, and already holds **22.6% of all impressions**
Site-wide title & description rewrite	Deployed 29 October — **after** this data window, so its effect is not yet visible
Razorpay went live	Mode-aware, fail-closed payment path with a signed webhook backstop
`/shop` catalogue	107 items wired to search, navigation and Sara — 3 impressions so far
Content pipeline	20 assets logged, 15 ready, **0 distributed with a posted date**

Search visibility — the period in numbers

2.1 TOTALS, 1 – 28 OCTOBER

MEASURE	VALUE	READING
Clicks	145	≈ 5.2 clicks per day
Impressions	8,620	≈ 308 per day
Click-through rate	1.68%	Below the 2–3% band normal for a mid-page-one mix
Average position	7.03	Solidly page one on an impression-weighted basis
Days with zero clicks	1	9 October — a low base, not a trend break
Peak clicks	14	23 October, the best day of the month
Peak impressions	1,038	27 October — 4.8× week-1's daily rate
Median daily impressions	227	Mean 308: the late-month tail lifts the average
Total pages with impressions	102	Up from a 51-URL sitemap in the previous cycle

2.2 WEEK BY WEEK

WEEK	DATES	CLICKS	IMPR.	CTR	AVG POS.	IMPR./DAY
W1	1 – 7 Oct	25	1,053	2.37%	7.14	150
W2	8 – 14 Oct	21	1,032	2.03%	7.45	147
W3	15 – 21 Oct	42	1,957	2.15%	6.06	280
W4	22 – 28 Oct	**57**	**4,578**	**1.25%**	7.32	**654**

Read the chart top-down: impressions quadrupled while clicks only doubled. The whole of October's capture problem is visible in the widening gap between the two right-hand columns.

IMPRESSION GROWTH

+336%

150 → 654 impressions per day, week 1 to week 4

CLICK GROWTH

+128%

25 → 57 clicks, week 1 to week 4

CTR MOVEMENT

−1.12 pt

2.37% → 1.25% as new long-tail pages entered page one

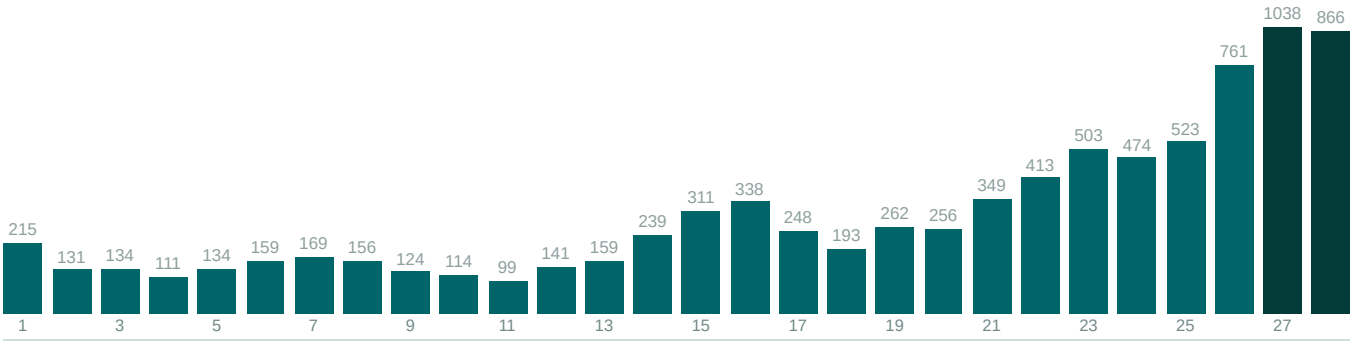

2.3 First half versus second half

The month's defining curve

HALF	CLICKS	IMPRESSIONS	CTR	IMPR./DAY
1 – 14 October	46	2,085	2.21%	149
15 – 28 October	99	6,535	1.51%	467
Change	**+115%**	**+213%**	**−0.70 pt**	**+214%**

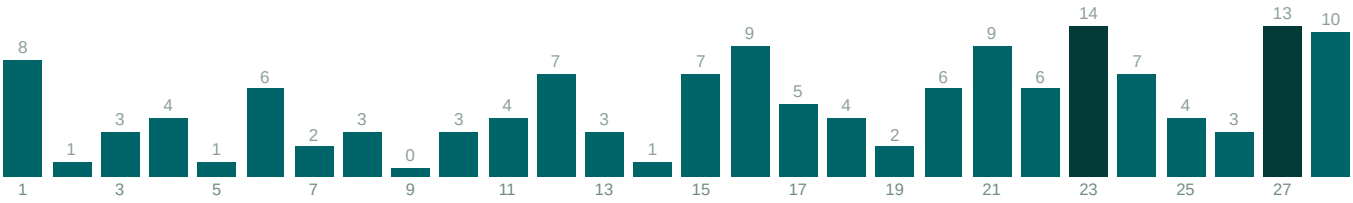

The site roughly **tripled its daily surface area** in the second half without losing position. Average position actually improved in week 3 (6.06) before settling at 7.32 in week 4 as a wave of new long-tail pages entered at lower ranks. That is healthy entry behaviour — new URLs appearing at position 8–10 before climbing — not a ranking regression.

2.4 Daily impressions, 1 – 28 October

Bars scaled to the 27 October peak of 1,038. Three days — 26, 27 and 28 October — carry **2,665 impressions, 31% of the month**, in a 72-hour window.

DAILY CLICKS OVER THE SAME WINDOW

Clicks are far noisier than impressions: 9 October produced none at all, while 23 October produced 14. The final three days carry **26 clicks — 18% of the month** — on the back of the impression surge.

BEST CLICK DAY

14

23 October · 503 impressions · 2.78% CTR

BEST IMPRESSION DAY

1,038

27 October · 13 clicks · average position 7.8

A single-day spike of that shape usually means one URL was temporarily promoted for a broad query, or a fresh article received an exploratory ranking. Both readings point at the same follow-up: identify what ranked, and make the landing page deserve the slot.

Where the audience sits

3.1 DEVICE

DEVICE	CLICKS	SHARE	IMPR.	SHARE	CTR	AVG POS.
Desktop	98	67.6%	5,144	59.7%	**1.91%**	6.90
Mobile	47	32.4%	3,451	40.0%	**1.36%**	7.20
Tablet	0	0.0%	25	0.3%	0.00%	5.64

Mobile carries 40% of impressions and 32% of clicks — a **0.55-point CTR deficit**. On a site whose stated target is low-end phones, that gap is a page-experience issue as much as a copy issue: title truncation, above-the-fold density and first-paint speed all bite harder on mobile. Closing the gap to desktop parity is worth roughly **19 clicks a month** on the current impression base.

3.2 GEOGRAPHY

COUNTRY	CLICKS	IMPR.	CTR	AVG POS.
India	141	8,054	1.75%	6.74
United Arab Emirates	2	105	1.90%	5.70
United States	0	127	0.00%	7.77
Singapore	0	29	0.00%	9.52
Brazil	0	27	0.00%	30.37
Pakistan	1	10	10.0%	13.00
Mozambique	1	4	25.0%	3.75
64 other countries	0	264	0.00%	—

India accounts for **93.4% of impressions and 97.2% of clicks**. The remaining 71 countries contribute 566 impressions and 4 clicks — mostly Tally's international licence and cloud footprint across the Gulf, Africa and South Asia, converting at zero because the site has no country-specific landing page. A low-priority but genuinely open flank.

3.3 SEARCH APPEARANCE

APPEARANCE	CLICKS	IMPR.	CTR	AVG POS.
Translated results	2	257	0.78%	6.40
Review snippet	0	4	0.00%	6.50

> Translated results covering **257 impressions** confirm a Hinglish and Hindi audience is already reaching the site — consistent with queries such as *tss ka matlab kya hota hai*, *tally me tss kya hota hai*, *tally prime में company कैसे बनाए*, and the brand spelling variants *सर्वज्ञ*, *sarvadny*, *sarwadnya*. The content does not yet serve that audience in its own language.

Top performing pages

4.1 BY CLICKS

#	PAGE	CLICKS	IMPR.	CTR	POSITION
1	/ (https)	39	671	5.81%	7.39
2	/news/how-to-lock-data-in-tallyprime	30	1,647	1.82%	**3.11**
3	/ (http variant)	27	473	5.71%	8.39
4	/news/cbd-belapur-it-companies-list	9	603	1.49%	6.63
5	/contact	5	242	2.07%	6.79
6	/news/how-to-add-gst-number-in-tally-erp-9	3	582	0.52%	5.92
7	/news/document-management-system-for-tally	3	125	2.40%	4.79
8	/tally-insights/…/latest-version-of-tally-prime	2	244	0.82%	10.09
9	/services/tss	2	45	**4.44%**	9.07
10	/news/tally-erp9-add-ons	2	26	7.69%	14.96
11	/news/tally-3-star-partner-mumbai	2	11	**18.18%**	6.27

Rows 1 and 3 are the same page served over two protocols. Combined, the homepage earns 66 clicks and 1,144 impressions at 5.77% — but 47% of those clicks sit on a URL that should not be ranking separately.

4.1A CLICK CONCENTRATION

GROUP	CLICKS	SHARE	COMMENT
Homepage (https + http)	66	45.2%	Brand demand — 27 of the 66 sit on the http URL
/news	56	38.4%	Editorial reach at 1.11% CTR
/tally-insights	7	4.8%	New section, 0.36% CTR
Commercial pages	14	9.6%	Products, services, cloud, contact, modules — high CTR, tiny bases
About, shop, addons, learn-sara	3	2.1%	Marginal

Total 146 clicks on the page report. Two surfaces — the homepage and `/news` — carry **84% of all clicks**; the entire commercial half of the site carries 10%. Concentration this steep means a change to two pages moves the month, and a change to the other hundred moves almost nothing.

HIGHEST CTR
39.3%
`sarvadnya infotech llp` — brand query at position 1.07

HIGHEST CTR, NON-BRAND PAGE
18.2%
`/news/tally-3-star-partner-mumbai` — 2 clicks from 11 impressions

BIGGEST SINGLE PAGE
19%
Share of all impressions held by one locking article

What the list says. Three of the top four pages are editorial — a how-to article, a directory list and the homepage. The commercial pages that do appear (`/services/tss`, `/news/tally-3-star-partner-mumbai`) convert at high rates on tiny impression bases. The pattern is consistent: *reach comes from editorial pages, clicks come from commercial ones, and the two sets barely overlap.*

4.2 By impressions

Reach lives here

#	PAGE	IMPR.	CLICKS	CTR	POSITION
1	/news/how-to-lock-data-in-tallyprime	1,647	30	1.82%	3.11
2	/news/tally-tss-expiry-meaning	890	1	0.11%	5.68
3	/ (https)	671	39	5.81%	7.39
4	/tally-insights/…/vouchers-types-contra	610	1	0.16%	7.79
5	/news/cbd-belapur-it-companies-list	603	9	1.49%	6.63
6	/news/how-to-add-gst-number-in-tally-erp-9	582	3	0.52%	5.92
7	/ (http variant)	473	27	5.71%	8.39
8	/news/tally-cloud-access	462	0	0.00%	10.69
9	/tally-insights/…/tally-prime-shortcuts-complete-list	427	0	0.00%	9.63
10	/cloud/tallycloudaccess	298	0	0.00%	**4.12**

4.3 Section totals

SECTION	CLICKS	IMPR.	CTR	COMMENT
Home (/, https + http)	66	1,144	5.77%	Brand demand; half the clicks sit on the http URL
/news	56	5,067	1.11%	59% of all impressions — the engine of reach
/tally-insights	7	1,946	0.36%	New section, already 22.6% of impressions
/cloud	2	494	0.40%	Ranked, not clicked
/contact (+ /contact-us/)	6	280	2.14%	Best-converting commercial page
/products	2	192	1.04%	Catalogue pages largely invisible
/about (+ /about-us/)	2	223	0.90%	—
/services (+ /modules)	4	172	2.32%	Small but efficient
/hrms	0	40	0.00%	Ranked, zero clicks
/shop, /addons, /learn-sara	0	7	0.00%	Not yet a search surface

> **Shape of the month.** Editorial pages generate reach; commercial pages generate clicks; the two sets barely overlap. The commercial half of the site ranks — `/cloud/tallycloudaccess` sits at position 4.12 — and still does not persuade anyone to click.

Query demand

The export itemises **376 queries totalling 44 clicks and 2,684 impressions** — 30% of clicks and 31% of impressions. The remaining two-thirds of traffic sits in long-tail queries not itemised in the file. The brand and non-brand split below therefore describes the *visible third* and should be read as directional, not exhaustive.

5.1 BRAND VERSUS NON-BRAND

CLASS	QUERIES	CLICKS	IMPR.	CTR	SHARE OF ATTRIBUTED CLICKS
Brand (Sarvadnya and spelling variants)	20	25	375	**6.67%**	56.8%
Non-brand	357	19	2,309	**0.82%**	43.2%

Branded search behaves exactly as it should: `sarvadnya infotech llp` converts at 39.3% from position 1.07, `sarvadnya technologies` at 22.2% from position 7.33. Non-brand conversion is an order of magnitude worse, so every additional non-brand click costs a title rewrite or a new article — not a ranking campaign.

5.2 TOP QUERIES BY CLICKS

QUERY	CLICKS	IMPR.	CTR	POSITION
sarvadnya technologies	14	63	22.2%	7.33
sarvadnya infotech llp	11	28	39.3%	1.07
how to lock tally data for previous year	3	54	5.6%	**1.81**
it companies in belapur	2	81	2.5%	9.15
software companies in navi mumbai	2	31	6.5%	20.23
tallycloudaccess	1	411	0.2%	**3.63**
belapur it company list	1	37	2.7%	5.46
belapur it company	1	20	5.0%	6.35
how to lock financial year in tally prime	1	14	7.1%	2.36
how to lock data in tally prime	1	9	11.1%	1.67

Four of the ten most-clicked queries belong to the "lock" family, all at positions 1.7–2.4. A page that ranks at position 2 behind a 5–11% CTR is doing its job. The problem is that the pages below it do not exist yet — this demand is answered by one article.

5.3 Top queries by impressions

Ranked, unclicked

QUERY	IMPR.	CLICKS	CTR	POSITION	CLUSTER
tallycloudaccess	411	1	0.2%	3.63	Cloud
sarvadnya	252	0	0.0%	5.87	Brand
tally prime 7.2	120	0	0.0%	9.92	Version
tallycloud access	105	0	0.0%	10.31	Cloud
tss expired in tally means	92	0	0.0%	**3.53**	TSS
it companies in belapur	81	2	2.5%	9.15	Local
sarvadnya technologies	63	14	22.2%	7.33	Brand
how to lock tally data for previous year	54	3	5.6%	1.81	Lock
types of voucher in tally	48	0	0.0%	9.17	Vouchers
tss full form in tally	38	0	0.0%	4.03	TSS
belapur it company list	37	1	2.7%	5.46	Local
tss expired in tally	35	0	0.0%	6.37	TSS
tss verify	35	0	0.0%	7.63	TSS
software companies in navi mumbai	31	2	6.5%	20.23	Local
sarvadnya infotech llp	28	11	39.3%	1.07	Brand

LARGEST SINGLE QUERY

411

`tallycloudaccess` at position 3.63 · 1 click · 0.2% CTR

BRAND NAME, UNCLICKED

252

`sarvadnya` at position 5.87 · 0 clicks

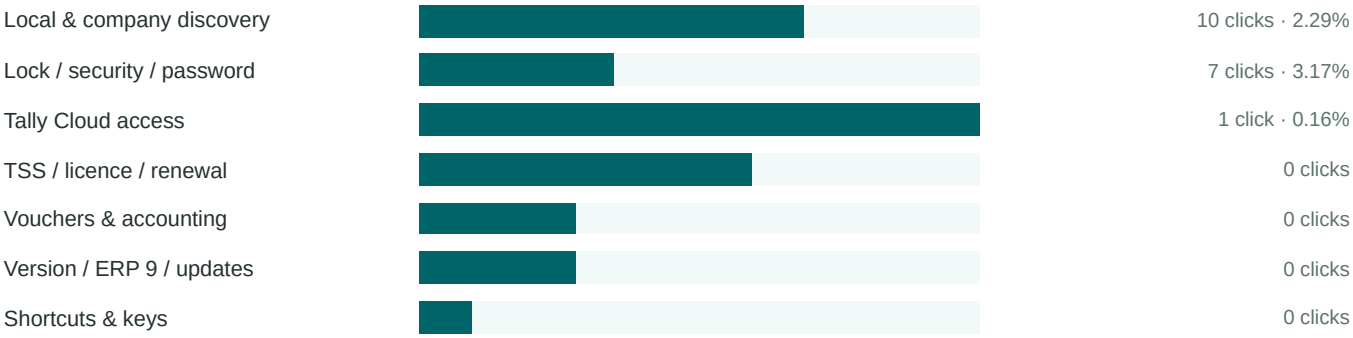

Two entries deserve attention. `tallycloudaccess` is the site's largest single query by impressions — 411, at position 3.63 — and produces one click. At that rank, 5–8% is normal. And `sarvadnya`, the brand's own name, draws 252 impressions at position 5.87 for zero clicks.

A brand-entity problem, not a metadata problem. A dozen queries in the export belong to other firms: *sarvadnya enterprises*, *sarvadnya computers*, *sarvadnya group*, *sarvadnya agro processing*, *sarvodaya infotech*, *shri sarvdnya infotech nagpur*, *sarvapanchhi technologies*, *saranyu technologies*. The brand SERP is genuinely ambiguous. Title work will not fix that; consistent NAP data, a stable Organization `@id` and a matching Google Business Profile will.

Which themes actually convert

Clustered from the 357 non-brand queries in the export

THEME	QUERIES	CLICKS	IMPR.	CTR	VERDICT
Local & company discovery (Belapur, Navi Mumbai, partner, near me)	48	**10**	436	**2.29%**	Proven converter — expand
Lock / security / password	29	**7**	221	**3.17%**	Best CTR on the site — expand and template
Tally Cloud access	40	1	636	0.16%	Ranked, uncaptured — fix titles
TSS / licence / renewal	40	0	378	0.00%	Ranked, uncaptured — revenue gap
Vouchers & accounting	45	0	177	0.00%	Reach only — needs entry-level guides
Version / ERP 9 / 7.2 updates	25	0	177	0.00%	Reach only — needs a release-hub page
GST	21	0	44	0.00%	Reach only — thin
Shortcuts & keys	31	0	57	0.00%	Reach only — cheat sheet exists, unclicked
HRMS / payroll	2	0	10	0.00%	Early
Learning / quiz / interview	2	0	4	0.00%	Early
Other / long tail	74	1	169	0.59%	—

> **Two clusters earn 17 of the 19 attributed non-brand clicks** — local company discovery and lock/security. Both carry how-to or directory intent with an obvious next step. Every other cluster is a reader audience with no destination page to send them to. That is the strategic map for November.

Clusters are keyword families applied in order; a query belongs to the first family it matches, so no query is counted twice. `Lock` and `Local` overlap conceptually but not in the query set — the lock cluster is tutorial intent, the local cluster is vendor-discovery intent.

Potential breakthroughs

Ranked by *addressable impressions × realistic CTR uplift*, not by current clicks. Every item below is a page or cluster that already ranks well and is losing traffic at the click stage — which means the work is copy and structure, not authority.

#	OPPORTUNITY	BASE	CURRENT	REALISTIC TARGET	EST. CLICKS
1	/news/how-to-lock-data-in-tallyprime — rewrite title + meta to match the query	1,647 impr @ 3.1	1.82% CTR	4–5% CTR	**+36 to +52**
2	Tally Cloud cluster — /cloud/tallycloudaccess + /news/tally-cloud-access + query set	1,171 impr	1 click	2% CTR	**+20 to +23**
3	TSS / renewal cluster — /news/tally-tss-expiry-meaning	890 + 378 impr	1 click	1.5–2% CTR	**+16 to +24**
4	Voucher types — /tally-insights/…/vouchers-types-contra	610 impr @ 7.8	1 click	2% CTR	**+11**
5	Local discovery expansion — new Belapur / Navi Mumbai / partner pages	436 impr @ 2.29%	10 clicks	3% on 800 impr	**+14**
6	Shortcuts cheat sheet — 427 impr, 0 clicks, pos 9.63	427 impr	0 clicks	1.5% CTR	**+6**
7	Hinglish / Hindi layer — translated results + ~10 transliterated queries	257 impr	2 clicks	2% CTR	**+3 to +5**
8	/products — 109 impr, 0 clicks, pos 7.93	109 impr	0 clicks	3% CTR	**+3**

COMBINED, DEFENSIBLE UPSIDE

+109 to +138 clicks per month — roughly a **doubling of October's click volume** — from copy and structure work on pages that already rank. No link building. No new domain authority. No ranking campaign.

Estimates assume conservative CTR for the position band (position 3 ≈ 4–5%, position 7–8 ≈ 2%, position 9–10 ≈ 1.5%) and no change in impressions. They are a floor, not a forecast: the 29 October title deployment is expected to lift several of these simultaneously.

HOW THE ESTIMATES WERE BUILT

POSITION BAND	ASSUMED CTR	BASIS
1 – 2	8 – 12%	The snippet is read; the only decision is whether to click
3 – 5	4 – 5%	Page one, competitive snippet — copy does most of the work
6 – 8	2%	Below the fold on page one
9 – 10	1.5%	Highest competition for attention in the snippet

Each estimate multiplies the page's current impressions by the target CTR for its band, subtracts clicks already earned, and assumes impressions do not change. That is deliberately a floor rather than a forecast: the 29 October title deployment is expected to lift several of these at once, and no estimate assumes a single new page or a single new impression.

The four that deserve a decision this month

1 The single highest-return edit on the site

`/news/how-to-lock-data-in-tallyprime`

1,647 impressions · position 3.11 · 1.82% CTR · 30 clicks. At position 3 a page normally earns 8–12%; this one earns 1.8%. The gap is almost entirely title and description intent: the query family — `how to lock tally data for previous year`, `how to lock financial year in tally prime`, `how to lock period in tally prime` — is answered by the page but not *promised* by the snippet. A title stating the action, the version and the outcome should move 30 clicks toward 70–80.

EFFORT: 1–2 HOURS · OWNER: WEB / SEO · PAYBACK: IMMEDIATE

2 A commercial page at position 4.12 with zero clicks

`/cloud/tallycloudaccess` · `/news/tally-cloud-access` · query `"tallycloudaccess"`

1,171 impressions across three URLs · 1 click. `/cloud/tallycloudaccess` holds 298 impressions at position 4.12; `/news/tally-cloud-access` holds 462 at 10.69; the query `tallycloudaccess` alone pulls 411 at 3.63. Three URLs, one intent, one click — the site's most visible commercial asset doing nothing.

The fix is structural, not cosmetic: one canonical destination page with a single offer, one set of internal links pointing at it, and the article rewritten to hand the reader over rather than compete with it.

EFFORT: 2–3 DAYS · OWNER: WEB / CONTENT · PAYBACK: 4–6 WEEKS

3 Ranked, revenue-relevant, and uncaptured

`TSS and licence renewal — 40 queries · 378 impressions · 0 clicks`

Average positions 3.5–6 on the strongest entries: `tss expired in tally means` (92 impressions, position 3.53), `tss full form in tally` (38, 4.03), `tss verify` (35, 7.63). The people searching this are mid-problem with a lapsed licence — the closest thing to an inbound renewal lead the site can get. Today they land on explanation content that does not ask them to act. One renewal page, one action, one outcome (check status → renew → confirm) is the missing step between 378 impressions of distress and a lead.

EFFORT: 3 DAYS · OWNER: WEB / CONTENT · PAYBACK: DIRECT REVENUE

4 The proven template, underexploited

`Local company discovery — 48 queries · 436 impressions · 10 clicks · 2.29%`

`it companies in belapur`, `belapur it company list`, `software companies in navi mumbai`, `tally partner near me`, `tally certified partner near me` — 48 queries, 436 impressions, **10 clicks at 2.29%**: 53% of all attributed non-brand clicks from 7% of non-brand impressions.

Only two pages currently serve this intent. A structured local set — Belapur, Navi Mumbai, CBD Belapur services, Tally partner in Mumbai, careers in Belapur — is the most reliable lead-generation move available, and the cheapest to write because the material already exists on the site.

EFFORT: 3 DAYS · OWNER: WEB / CONTENT · PAYBACK: 4 WEEKS

The **29 October site-wide action-led titles and descriptions** deployment landed *after* this export's window closed. The improvement is live; it is simply not yet visible in this data. November's export will be the first honest read on whether the title work moved CTR.

Leakage and risk

8.1 NON-CANONICAL DUPLICATION

URL VARIANT	CLICKS	IMPR.	CTR	POSITION
https://sarvadnyainfotech.com/	39	671	5.81%	7.39
http://sarvadnyainfotech.com/	**27**	**473**	5.71%	8.39
www.sarvadnyainfotech.com (6 pages)	2	105	1.90%	—
Legacy old-site paths (8 URLs)	3	158	1.90%	—

> **47% of homepage clicks and 41% of homepage impressions are attributed to the `http://` variant.** The two variants rank separately (7.39 vs 8.39) and split their own signal. Add the `www` variants and the legacy paths, and roughly **736 impressions (8.5%) and 32 clicks (22%)** of the month sit on URLs that should be consolidated or removed.

Residual legacy paths still receiving impressions: `/about-us/`, `/contact-us/`, `/tally-product-2/`, `/tally-prime-services/`, `/privacy-policy/`, `/tally-cloud-services/`, `/erp-consulting-services-3/`, `/2021/02/10/hello-world/`. Item WEB-005 (16 Oct) began this cleanup; eight URLs remain.

8.2 ZERO-CLICK INVENTORY

PAGE	IMPR.	POSITION
/news/tally-cloud-access	462	10.69
/tally-insights/…/tally-prime-shortcuts-complete-list	427	9.63
/cloud/tallycloudaccess	298	4.12
/products	109	7.93
/tally-insights/…/tally-erp9-vs-tally-prime	69	5.13
/news/how-to-check-tss-expiry-date-tallyprime	66	5.55
/news/tallyprime-international-licenses	54	4.15
/hrms	40	7.45

Eight pages, **1,525 impressions — 17.7% of the month — and zero clicks.** This is not a content problem; all eight rank on page one. It is entirely a snippet problem, and it is the single most mechanical fix available.

Website updates delivered

Eleven rows logged · ten genuine tasks · all completed · none overdue

Eleven rows are logged in October, all completed, none overdue, median turnaround one day, two high-priority. One row (WEB-001) is the tracker's sample entry, so the genuine task count is **10**. The codebase records the same period as **117 commits**; the releases behind the summary rows are listed at the foot of this page.

ID	CATEGORY	WORK	PRIORITY	STATUS	PUBLISHED	DAYS
`WEB-001`	Product / Service	Gate Pass module (HRMS) *(sample row)*	High	Completed	7 Oct	2
`WEB-002`	New / Modified	Razorpay integration — live mode + signed webhook	High	Completed	—	—
`WEB-003`	Career	Single-click form submit — one form, many roles	Low	Completed	6 Oct	1
`WEB-004`	New / Modified	Logo changed to circular version	Low	Completed	6 Oct	—
`WEB-005`	New / Modified	SEO — remove old-site pages from index	Medium	Completed	16 Oct	1
`WEB-006`	New / Modified	SEO — keyword-targeted blog articles added	Low	Completed	16 Oct	1
`WEB-007`	Career	Referral feature for existing account holders	Low	Completed	17 Oct	0
`WEB-008`	New / Modified	Tally Insights learning section	Medium	Completed	30 Oct	2
`WEB-009`	Product / Service	SEO detail added to Tally customised products	Medium	Completed	27 Oct	2
`WEB-010`	New / Modified	Content accuracy updated per release changes	Low	Completed	27 Oct	2
`WEB-010` `duplicate ID`	New / Modified	Ask Sara answer fix for internal TSS renewal link	Low	Completed	28 Oct	0

9.1 WHAT SHIPPED BEHIND THESE ROWS

RELEASE	WHAT IT CHANGED	SEARCH RELEVANCE
Tally Insights section 22–27 Oct	Hub split into individually indexable pages, sidebar and search, server-rendered tables, full curriculum, 7.2 artwork	**22.6% of all impressions**; 102 pages now reachable
Razorpay go-live 17 Oct	Mode-aware, fail-closed payment path with a signed webhook backstop	Enables the commerce funnel
Site-wide action-led titles 29 Oct	Metadata rewritten across the site	Directly targets this month's CTR gap — effect visible next export
`/shop` catalogue 23 Oct	107-item product catalogue wired to search, navigation and Sara	Not yet a search surface (3 impressions)
Reviews wall 23 Oct	Multi-direction review section with role, rating and source	Review-snippet eligibility (4 impressions so far)

> **The tracker is a task log, not a change log.** Ten rows describe the month's reported work; 117 commits describe what actually changed. The quiet releases — the Ask Sara guard, careers mail with OTP, module PDF brochures, the referral feature — are the ones most likely to go unrecorded.

The tracker shows the same ID (`WEB-010`) on two rows. Worth correcting before November inherits it.

Digital content production

Twenty genuine items are logged (DC-002 to DC-021; DC-001 is the tracker's sample row).

STATUS	ITEMS	SHARE
Ready	**15**	75%
Pending approval	2	10%
In design	2	10%
Cancelled	1	5%
Posted (with a date, excl. sample)	**0**	0%

TYPE	ITEMS	SHARE
Catalogue / brochure	8	40%
Creative	6	30%
Brand promotion	5	25%
Social post	1	5%

Platform mix: Website 8 · Other 7 · Instagram 3 · WhatsApp 1 · LinkedIn, YouTube, Facebook, Google Business: **0**.

10.1 Item log

ID	TYPE	TITLE	PLATFORM	STATUS
DC-002	Creative	TallyPrime 7.2 new features	Instagram	Pending approval
DC-003	Brand promotion	Company card design structure	Other	Cancelled
DC-004	Brand promotion	Letterhead draft	Other	In design
DC-005	Brand promotion	Card design — back side	Other	Ready
DC-006	Social post	Tally on Mobile app	Instagram	Pending approval
DC-007	Catalogue	CFA module brochure	Website	Ready
DC-008	Catalogue	Document Management System brochure	WhatsApp	Ready
DC-009	Catalogue	Agent / Salesman brochure	Website	Ready
DC-010	Catalogue	DMS — 2-page design	Other	Ready
DC-011	Brand promotion	Business card back side (modules added)	Other	Ready
DC-012	Creative	Tally on Mobile offer banner	Other	Ready
DC-013	Brand promotion	Letterhead design	Other	In design
DC-014	Catalogue	Garment & footwear module brochure	Website	Ready
DC-015	Catalogue	Container handling module	Website	Ready
DC-016	Creative	Diwali greeting	Other	Ready
DC-017	Creative	Christmas greeting	Other	Ready
DC-018	Creative	New year greeting	Other	Ready
DC-019	Creative	TSS renewal with 6 invoice templates	Instagram	Ready
DC-020	Catalogue	Housing module	Website	Ready
DC-021	Catalogue	Transport module	Website	Ready

10.2 The distribution gap

Fifteen assets are finished and sitting on Google Drive. Zero carry a posted date. The single `Posted` row in the dashboard total is the tracker's sample entry. That means **production outperformed distribution by roughly 15 to 1 this month.**

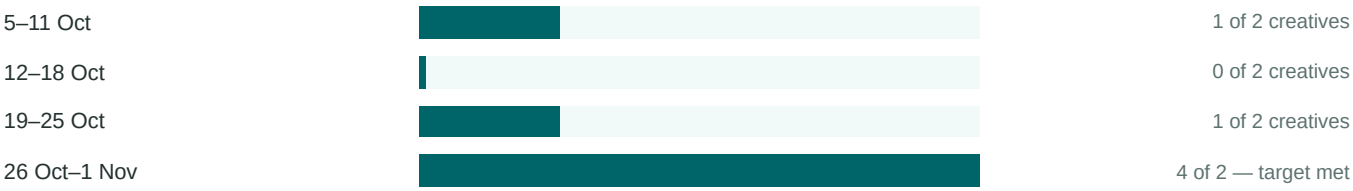

For a function whose stated objective is *lead generation*, ready-but-unpublished collateral is inventory, not output. Two of the six brochures exist specifically to be shared with clients who show interest (DC-008, DC-010) — that distribution is one WhatsApp message away and has not happened.

> **The ratio to fix.** Twenty designed, one posted. The design capacity is not the constraint; the approval and publishing step is. Unblocking it converts October's inventory into November's reach at zero additional cost.

11. Weekly targets

Target: **2 creatives + 1 audio/visual per week.**

WEEK	CREATIVES	TARGET	A/V	TARGET	RESULT
5 – 11 Oct	1	2	0	1	Missed
12 – 18 Oct	0	2	0	1	Missed
19 – 25 Oct	1	2	0	1	Missed
26 Oct – 1 Nov	**4**	2	0	1	Pending — creative target met

Weeks met: 0 of 4. Creative target met in 1 of 4 weeks. Audio/visual: 0 of 4, and zero items produced for the month.

The 26 October week is the turnaround: four creatives delivered against a target of two. If that rate persists, November clears the creative target — but the audio/visual line stays at zero until the equipment issue recorded in the biweekly report (no audio output on the current system) is resolved.

11.2 Collateral readiness

PRODUCT / SERVICE	CATALOGUE	BROCHURE	VIDEO
Tally Customized Product	—	In progress	—
Tally Cloud	—	—	—
HRMS	—	—	—
Mobile App	—	—	—
Tally Updates / Releases	—	—	—
Other Services	—	—	—

0 of 6 products has a complete set. One brochure track is in progress. Eight module brochures were designed this month — CFA, DMS (×2), agent/salesman, garment & footwear, container handling, housing, transport — but they are not yet filed against the readiness grid, which is why the dashboard reads 0%. **Filing them is a ten-minute admin task that changes the reported picture.**

COLLATERAL PRODUCED IN OCTOBER, NOT YET FILED

ASSET	TRACKER ID	FORMAT	FILED TO GRID
CFA module brochure	DC-007	Website brochure	No
Document Management System brochure	DC-008	WhatsApp brochure	No
Agent / salesman brochure	DC-009	Website brochure	No
Garment & footwear module	DC-014	Website brochure	No
Container handling module	DC-015	Website brochure	No
Housing module	DC-020	Website brochure	No
Transport module	DC-021	Website brochure	No

Every line above is traded by the firm and absent from the search index. The brochure is the raw material for the product pages in the November plan — filing it against the grid and publishing it are the same job.

11.3 Blockers

BLOCKER	IMPACT	OWNER
Social media login pending	Two finished creatives (7.2 flyer, Mobile app post) held at "Pending Approval"	Mgmt / Marketing
No audio output on the workstation	**Zero audio/visual items for the month**	IT
Design revisions cycling	2 assets in design, 1 cancelled, letterhead awaits template choice	Design / Mgmt
Approval latency	No asset moved from Ready to Posted	Mgmt
Tracker hygiene	Sample rows counted by dashboard formulas; duplicate WEB-010	Web team

CAPACITY READ

20 assets designed in October — a rate of **5 per week** against a stated target of 3. Capacity is not the constraint. Distribution is.

Trends and lessons

12.1 THE MONTH'S CURVE

DIMENSION	FIRST HALF	SECOND HALF	DIRECTION
Impressions per day	149	467	+214%
Clicks	46	99	+115%
CTR	2.21%	1.51%	↓ dilution
Average position	7.29	6.94	↑ improved
Pages with impressions	—	102 for the month	Expanding surface

Reach grew faster than clicks while position improved. That combination is normally the signature of **new URLs entering page one**, not of ranking collapse: the site gained surface area faster than it gained relevance on that new surface.

12.2 VERSUS THE PREVIOUS REPORTING CYCLE

The August–September monthly report closed with a 51-URL sitemap, a completed canonical cutover, and one explicit next step: *"watch post-rebrand indexation in Search Console."* October is the answer to that watch.

DIMENSION	AUG – SEP CYCLE	OCTOBER	READING
Indexable surface	51 sitemap URLs	**102 URLs receiving impressions**	First measured evidence of indexation completing
Content structure	10 seeded posts, static routes	News + Tally Insights, individually indexable lessons	Reach now comes from structure, not seeding
Search data	No export in the cycle	**8,620 impr / 145 clicks / 28 days**	Baseline established
CTR discipline	Metadata written per page	Site-wide action-led titles deployed 29 Oct	The fix landed after the window
Commercial capture	Commerce built	Built but not yet visible in search	The gap moved from build to discovery
Content output	Blog seeding + collateral start	20 assets, 15 ready, 0 distributed	Production healthy, publishing stalled

12.3 LESSONS

> **1. Ranking and converting are different jobs — and the site is now good at the first one.** Eight page-one pages produce zero clicks. Ranking work is largely done for the clusters that matter; the binding constraint has moved to copy and structure.

> **2. Two content types convert and both are cheap.** Local discovery and how-to locking produce 17 of 19 non-brand clicks. Both are informational, both need no proprietary data, and both already exist in some form. Doubling them is low-risk.

> **3. The Tally Insights investment is paying back early.** A section built in the last ten days of the month already holds 22.6% of impressions. Individually indexable pages turned a curriculum into a search asset; the same treatment on `/products`, `/cloud` and `/services` is the obvious next deployment.

> **4. Commerce is invisible in search.** `/shop`, `/addons`, `/products` and `/hrms` hold 245 impressions together. The site sells licences, renewals and hosting; search does not yet know that. Product-page SEO is the shortest path from traffic to revenue.

> **5. Design capacity is spent where search cannot see it.** 40% of October's content output was brochures and catalogues; 5% was social. The pages winning impressions are editorial. A modest reallocation toward search-facing writing compounds faster than more brochures.

> **6. The brand SERP is an identity problem, not a ranking problem.** The brand's own term draws 252 impressions at position 5.87 with zero clicks while a dozen lookalike entities occupy the same space. Metadata will not fix that; entity consistency will.

November plan

#	PRIORITY	ACTION	OWNER	EFFORT	TARGET OUTCOME
1	**High**	Rewrite title + meta on the 8 zero-click pages, starting with the locking article	Web / SEO	2 days	CTR 1.68% → 2.5% site-wide
2	**High**	Consolidate `http://`, `www` and 8 legacy URLs into the canonical https set	Web / SEO	1 day	Recover ~700 impressions onto canonical URLs
3	**High**	Publish the 15 Ready assets — minimum 2 per week, logged with a posted date	Design / Marketing	Ongoing	8 posts live; weekly target met
4	**High**	Resolve social login and approvals so nothing sits at "Pending Approval"	Mgmt	1 day	0 items blocked at approval
5	**High**	Build the TSS renewal capture page: one page, one action, one outcome	Web / Content	3 days	First clicks from the 378-impression TSS cluster
6	Medium	Restructure `/cloud` and `/products` into individually indexable product pages	Web	3 days	1,171-impression cloud cluster starts converting
7	Medium	Local page set: Belapur, Navi Mumbai, Tally partner in Mumbai, careers in Belapur	Web / Content	3 days	Double the 436-impression local cluster
8	Medium	Publish 2 Hinglish explainer pages (TSS meaning, Tally on mobile)	Content	2 days	Serve the 257-impression translated audience
9	Medium	File the 8 module brochures against the readiness grid; complete 2 product sets	Design	1 day	Readiness moves off 0%
10	Low	Entity reinforcement: one NAP block, stable Organization `@id`, matching Google Business Profile	Web / SEO	2 days	Brand CTR above 6.67%
11	Low	Resolve the audio/visual blocker; produce 2 reels from existing brochure assets	IT / Design	1 day	2 of 4 A/V target
12	Low	Tracker hygiene: delete sample rows, fix duplicate ID, refresh dashboard formulas	Web team	1 hour	Dashboard equals row detail

13.1 Success criteria

MEASURE	OCTOBER BASELINE	NOVEMBER TARGET
Clicks (28 days)	145	**200+**
Click-through rate	1.68%	**2.2%+**
Zero-click pages above 40 impressions	8	**≤ 3**
Non-brand CTR	0.82%	**1.5%+**
Assets published	0	**8+**
Creative weekly target met	1 of 4 weeks	**4 of 4 weeks**
Products with a complete collateral set	0 of 6	**2 of 6**
Canonical / legacy URL leakage	736 impressions	**≤ 100 impressions**

Measurement notes

DATA DEFINITIONS

- **Clicks** — Google Search result clicks, not on-site sessions. Excludes paid, direct and social.
- **Impressions** — a result link view on a search results page. Not unique visitors.
- **CTR** — clicks ÷ impressions. **Position** — impression-weighted average.
- **Brand query** — any query beginning with the Sarvadnya name or a recorded spelling variant (`sarvadnya`, `sarvdnya`, `sarwadnya`, `sarvadny`).
- **Theme cluster** — a keyword family applied to the non-brand query set; a query belongs to the first family it matches, so no query is counted twice.

CAVEATS

1. The Search Console export covers **1–28 October** (last 28 days, web search only). Site-side reporting covers 1–31 October. The two windows differ by three days.
2. The query table itemises **44 clicks and 2,684 impressions** — 30% of clicks and 31% of impressions. The remainder sits in long-tail queries not present in the file. Brand/non-brand and cluster analysis therefore describe the visible third.
3. Page-level sums (146 clicks / 9,708 impressions) exceed the site totals by 1 click and 1,088 impressions because duplicate URL variants (`http://`, `www`) are reported as separate pages.
4. This is the first month in the reporting cycle with a full Search Console export. No month-on-month search comparison is presented; all comparisons above are intra-month.
5. The 29 October titles and descriptions release is **outside** the data window. Its effect is not represented anywhere in this report and will first appear in the November export.
6. The tracker's dashboard tiles count the yellow sample rows (WEB-001, DC-001) and were not recalculated for this export. Row-level figures are used throughout this report.
7. Estimated uplift figures in section 7 are modelled from position-band CTR assumptions, not measured forecasts. They are deliberately conservative.
